Emergency Procedures

Introduction

Emergencies like road accidents, fires and medical emergencies happen somewhere in the country almost every minute of every day and are dealt with quickly and efficiently by the emergency services.

North East Lincolnshire Council and other responding organisations have emergency plans in place for larger events that stretch the resources of the emergency services and affect large numbers of people or the environment.

These procedures give an overview of how Town and Parish Councils can support their community during the response to an emergency, and importantly, how you can encourage residents to be prepared for emergencies.

The Cabinet Office definition of community resilience is '...communities and individuals harnessing local resources and expertise to help themselves in an emergency in a way that complements the response of the emergency services'.
